

give2givehope

annual report

2012

I am amazed once again at how God has continued to bless and use Give2GiveHope to accomplish his work. 2012 was another incredible year for our organization. We had anticipated ending the year with 90 sponsored children and we ended up with 105. A 50% growth rate from 2011!

We were able to install 47 more water filters in Honduras. Through the generosity of our donors, we now have provided clean drinking water to 111 families. We're definitely having a big

impact on the community as seen in the health and educational performance of the children. In December 2012 we placed an order for another 75 water filters that we will take with us on our next trip.

Through a generous donor, we were able to begin construction on the Give2GiveHope vocational school. Work has been completed on the concrete foundation of Phase 1 (the workshop) and we hope to have it completed by the end of 2013. Phase 2 (classroom, office, and storage areas) will start after we have finished the workshop.

Our volunteer site coordinators, Javier and Letty Vallecillo, were able to visit us in June and stayed with us for 10 days during their trip to the U.S. to raise support. We hosted a "Grateful Gathering" at the Castle Museum in Saginaw, Michigan, and were able to present the mission of Monte de Santidad and Give2GiveHope at several group meetings and churches.

Because our volunteer coordinators traveled to the United States this year, we didn't take our normal VisionCatcher mission trip in June, but instead invited a few child sponsors to join us on our administrative trip in October. The experience was so successful that we plan to continue our MiniMissions in the future.

Overall, 2012 was another incredible year of growth for us as we explored new territory and solidified our existing child sponsorship and water filter programs. We anticipate growth to continue in 2013, and we are so thankful for all those who have joined us on this journey allowing us to complete God's work, God's way, in God's time and for God's glory!

2012 financial review

	Donations	Expenditures
Child Sponsorship	\$30,725	\$25,997
Child Education	\$6,615	\$7,178
Child Clothing	\$751	\$498
Child Medical	\$30	\$70
Child & Volunteer Gifts	\$2,135	\$2,250
Project Clean H2Ope	\$1,955	\$0
Mission Experience Scholarships	\$6,515	\$2,140
Other Program Expenses	---	\$1,575
Salaries	---	\$0
Fundraising	\$0	\$495
Miscellaneous Donations / Expenses	\$14,950	\$5,268
2012 Totals	\$63,676	\$45,471
Retained Earnings		\$18,205

In 2012, 87% of Give2GiveHope's operating expenses were used for programs that benefit impoverished children and their families.

2012 retained earnings will be used in the future for Project Clean H2Ope, the Give2GiveHope vocational school, mission experience scholarships and other projects that bring hope to the communities we serve.

*Operations include PayPal and foreign exchange fees, wire transfer fees, marketing, postage, printing, legal and professional fees, fundraising, administrative travel, supplies and other general expenses.

MiniMission

In 2012, we took a short five-day mission trip to Honduras and invited some child sponsors to join us. Our primary goals were to deliver and install the new Sawyer water filters, to complete the provision shopping for the children in October, and to take video footage of our programs.

We are using this to develop marketing pieces to share and promote our activities. We have a couple of these videos already available on our website if you'd like to check them out! All three of our attendees had such great experiences that they accepted invitations to join our Board of Directors. We are planning to continue our MiniMission trips in the future. If you're interested in joining us, please let us know!

Ken Hayes, Erica Hainstock, Barbara Wallace, and Jeff Westheim had a fantastic experience on MiniMission2012 in October.

Faith in Action

We were tremendously blessed in 2012 to have received support from several churches that believe in Give2GiveHope's mission to help the "least of these" in practical and real ways. Ogemaw Hills Free Methodist Church in West Branch, Michigan, and Tawas Presbyterian Church in Tawas, Michigan, both held "flip-flop drives" during their Vacation Bible School programs and donated over 400 pairs of flip-flops. Faith

Alive Church in West Branch, Michigan, held a VBS fundraiser in August and donated \$450 to Give2GiveHope. St. Joseph Catholic School in West Branch invited Give2GiveHope to present during "Catholic Schools Week" in February and raised over \$200 toward Project Clean H2Ope water filters. We also received a \$6,100 donation from Capilano Christian Assembly in Edmonton, Alberta, Canada from their church's Thanksgiving fundraiser.

VBS kids from Faith Alive Church in West Branch, Mi. were thrilled to help poor children through a \$450 donation to Give2GiveHope.

Child Sponsorship Brings Hope to 105 Children in 2012

When Give2GiveHope was started in May of 2009, we had a vision of providing food to 100 children in need. In October 2012, that dream became a reality as more and more sponsors have joined us in our mission of providing help to impoverished children. Our goal for 2013 is to reach 120 children in need each

month with the nutrition, medicines and education they need to grow up healthy.

In 2012, we also began to distribute some “spiritual food” in the form of monthly devotionals which are given to the children with their food on distribution day. These devotionals are the loving handiwork of one of our Give2GiveHope sponsors, and they were well received by the families in Honduras.

Thank You to all our child sponsors listed here who are making huge impacts on the lives of children and their families!

Angeles was abandoned by her parents. She receives food each month through Give2GiveHope. Her monthly food provisions have made the difference between life and death for this beautiful little girl.

If you would like to sponsor an urgent needs child, visit our website at www.give2givehope.org/urgent.

Breaking New Ground

Many children in Honduras drop out of school by sixth grade because they're needed to work and help provide for their families. Give2GiveHope believes that education is one of the most important tools in breaking the cycle of poverty, but culturally, there isn't as much emphasis placed on education as there is in the United States or Canada.

A few Give2GiveHope children have expressed interest in continuing their education and their sponsors have agreed to provide the funds needed each month to allow their children to attend vocational or secondary schools in Puerto Cortes. In 2012, three of these young men graduated from secondary education. They now have the skills, training, and knowledge to become gainfully employed.

Give2GiveHope wants to make secondary education a possibility for more children. Thanks to several donors, in 2012 we were able to begin building the Give2GiveHope vocational school. The school will be a place where young men and women can come to learn skills and trades that will help them break the cycle of poverty. To donate or learn more about this project, visit www.give2givehope.org/school.

g2ggh vocational school

(Above) Sito and many other young men in the community went to work on digging the foundations by hand, for the Give2GiveHope vocational school.

(Above right) Foundations were filled with rocks from the river and cement. (Right) Ariel, one of the young men to graduate this year, receives his diploma from CTECH technical school. He studied auto repair, machine repair, English, computers and math.

Over 100 Families Now With Clean Water ... And Counting

Our MiniMission team delivered and installed another 47 clean water filters to Honduras in 2012 bringing the total of water filters we've installed to 111. This year we moved away from our bio-sand filters to filters produced by Sawyer. The Sawyer water filters are based on dialysis technology and are used by the U.S. military to provide safe drinking water

Ken Hayes and Jeff Westheim of Give2GiveHope examine the clean water that the Sawyer water filters produce from dirty river water. Project Clean H2Ope is changing this community in dramatic ways. The children are healthier and their school grades are improved.

when they are in foreign countries. The Sawyer water filters last longer than the bio-sand filters, are easier to maintain and install in less than a minute. They filter up to 500 gallons of water per day from all sources (rivers, ponds, lakes, cisterns, etc.). With a .1 absolute micron rating, they filter out 99.99999% of bacteria, protozoa, E. coli, Giardia, Vibrio cholera and Salmonella typhi (which cause Cholera & Typhoid). These filters are saving the lives of children and their families!

project clean h2ope

We are thankful for the donors who have supported Project Clean H2Ope in 2012. Join us by funding a filter today so Give2GiveHope can continue to provide clean water in 2013 and beyond.
